EDUCATION

De Anza Community College | A.S. Computer Science, Transfer Track | *Sep 2024 - Present*

Andrew Hill High School | *Aug 2020 - Jun 2024*

PROJECTS

Codebase Search Engine | GitHub | *React, TypeScript, Vite, Neon, pgvector, OpenAI API*

- Built a **semantic code search tool** with one other developer that indexes GitHub repositories and lets developers search their code using natural language instead of exact keywords
- Integrated the **OpenAI API** to generate embeddings for indexed code, enabling concept-based search that matches how developers actually remember code
- Stored and queried vector embeddings using **pgvector** on **Neon** (serverless Postgres) for fast similarity search across repositories

ProcureMate | GitHub | *React, TypeScript, Vite, FastAPI, SQLAlchemy, PostgreSQL*

- Built **ProcureMate**, a full-stack async procurement app using **FastAPI**, **PostgreSQL**, and **Redis** with multi-layered auth (OAuth, sessions, API keys) and configurable rate limiting
- Implemented background job processing with **Taskiq**, generic CRUD with **FastCRUD**.

EXPERIENCE

Lamson Manufacturing | *IT Technician Volunteer* | May 2020 - Mar 2025

• Repaired and maintained company computers, printers, networking equipment, and office devices

• Provided fast IT support under tight deadlines to keep systems running efficiently

Rabbit Rabbit Tea | *Tea Barista / Team Member* | Oct 2025 - Feb 2026

• Operated POS systems, prepared beverages, and collaborated with team members to maintain efficient workflow

SKILLS

Languages: C++, Java, JavaScript, TypeScript, HTML, CSS, Python

Frontend: React, Tailwind CSS, React Flow, TanStack Start, Next JS

Backend: Node.js, Express.js, FastAPI,

Tools: Git, GitHub, Arduino, Claude Code, Codex, WebStorm, PyCharm, Visual Studio Code
